

10 ONLINE SECURITY TIPS

Basic recommendations by MoraBanc for secure online browsing and preventing potential fraud on the Internet.

Never provide your online banking passwords to third parties or post them on your social media

1

Do not open emails or files from unknown sources

2

Do not connect to online banking from unsecured Wi-Fi connections and take precautions in your Bluetooth connections

3

Do not trust gifts or promotions that are easy to obtain in advertisements on the Internet

4

Keep your device updated at all times: browsers, operating system, etc.

5

Install an antivirus and a firewall on your device, and update them regularly

6

Do not use PINs or passwords that are easy to guess

7

Do not connect a USB drive to your PC if you are uncertain of its origin

8

Use your common sense if anything raises the slightest suspicion

9

Keep yourself informed of the main security threats and risks on the Internet
